

## Wall Stabilization / WallAnchor 25yr Warranty

We guarantee the performance of the Wall Stabilization System if the owners of the home provide an adequate gutter system with 6 foot downspout extensions. The homeowner must keep gutters clean and have soil and concrete sloped away from the home for proper drainage, with landscape fabric and not plastic. This guarantees, for a period of Twenty-Five (25) years, that the wall will not displace inwardly. If such displacement does occur, we will correct the problem at our expense or remove the anchors and refund the full amount of money paid to us. This warranty is effective upon payment of all sums due and is transferable to subsequent owners of the premises, if we are notified in writing within thirty (30) days after transfer with no exceptions or guarantees. This warranty does not include damages as a result of:

1. Acts of God
2. Lack of Gutter Maintenance
3. Negative or improperly maintained grade
4. Tightening beyond recommended torque settings (over tightening)
5. Over tightening beyond plumb (wall push out)
6. Temperatures not maintained above freezing
7. Slope Stability or Mud Slides
8. Backfilled around foundation with inappropriate materials (example rock)
